

MMPI-2-RF & MMPI-3 PRACTICE CASES

Practice Case: Jayden

Jayden completed the MMPI-2-RF-EX as part of the intake procedures at a university student clinic. He was referred for treatment following a violation of the campus housing alcohol policy involving underage drinking. Both the MMPI-2-RF and the MMPI-3 score reports were derived from this same test administration.

Jayden is a 21-year-old Black man. He graduated from high school and is in his third year at a large university. He lives in an apartment complex owned by the university and is roommates with a friend he has known since high school. He works 20 to 30 hours a week at a big-box retail store. Jayden's grades are somewhat above average, and he is making timely progress toward an undergraduate degree in Business Administration. Jayden has a small group of friends outside of his roommate. He has not been in a romantic relationship since high school.

Jayden is the youngest of three children. His older sisters are both teachers and are married. Jayden's parents have been married for 30 years. His father was permanently disabled following an industrial accident eight years ago. His mother works as a school bus driver. Jayden reports feeling supported by his family and has infrequent but meaningful contact with them.

Jayden began drinking in high school at parties. He explained this behavior increased in college in large part because he has trouble feeling comfortable meeting new people. Jayden and his roommate were hosting a party with the hopes of meeting some potential romantic partners when the party was broken up by campus security following repeated noise complaints. Because many of the people present at the party were underage, Jayden and his roommate were found in violation of campus policy and required to undergo alcohol counseling. Jayden reports some

symptoms of anxiety, especially social anxiety. He otherwise denies any experience of or prior history of treatment for mental health concerns.

Jayden appeared motivated to complete the testing and did so in a single session without breaks, questions, or any other behaviors of note.

Note. This information is provided to facilitate interpretation following the recommended structure for MMPI-2-RF interpretation in Chapter 5 of the *MMPI-2-RF Manual for Administration, Scoring, and Interpretation*, which provides details in the text and an outline in Table 5-1.

NOTE: The final pages of this report display any items that were skipped or unscorable as well as any endorsed items that are part of a critical responses or critical items list. These sections include both the item number and content. The final page of the report includes the test taker's item level responses to every test item. These pages are not displayed in this book in order to maintain test security; however, redacted sample reports are available on the Pearson Assessments' website.
